PROFESSIONAL SUMMARY

AI/ML Engineer with 2+ years of experience building production-grade Generative AI and classic ML/NLP systems across financial audit automation, compliance, and computer vision. Skilled in agentic AI (MCP, ReAct agents, CrewAI), RAG pipelines, transformer-based NLP (BERT), and LLM fine-tuning, with hands-on deployment to Azure and AWS. Proven track record shipping scalable, secure AI systems that drive measurable business impact.

TECHNICAL SKILLS

Machine Learning & NLP: Classic ML, NLP, BERT, Transformers, Deep Learning, OCR, Computer Vision (YOLO, U-Net, CNNs)

Generative AI & Agents: Agentic AI, MCP (Model Context Protocol), ReAct Agents, CrewAI, LLM Fine-tuning, Prompt Engineering, RAG, Embedding Models

Languages & Cloud: Python, SQL (PostgreSQL, MySQL), Bash, Azure Cloud, Azure AI, AWS (familiarity)

Frameworks & Core ML: FastAPI, Flask, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, SciPy, OpenCV

Databases & Tools: MongoDB, Vector Databases (FAISS, ChromaDB), Ollama, Git, Docker, REST APIs, Jira/GitHub (Agile/Scrum)

WORK EXPERIENCE

AI Developer — Moksha Infotech, India

December 2024 – Present

- Architected 3 end-to-end AI automation pipelines for financial audit and banking compliance workflows using FastAPI, reducing manual review cycles by 30% across enterprise client engagements.
- Fine-tuned Mistral 7B on 10,000+ domain-specific financial documents for automated report generation, improving data extraction accuracy by 25% using supervised techniques.
- Led Generative AI risk and compliance-check solutions, eliminating 8+ hours of weekly manual validation and strengthening internal controls.
- Built multi-step agentic workflows for autonomous decision-making across 5 financial stages, cutting human intervention by 40%.
- Mentored 4 junior AI developers through weekly code reviews, promoting secure coding practices and reducing production bug rates by 35% over 6 months.
- Collaborated with cross-functional enterprise stakeholders to deploy scalable REST APIs aligned with client risk parameters and business objectives.

AI Engineer Intern — Mayowish, Bangalore, India

August 2023 – May 2024

- Optimized a Python template-matching module with OpenCV, boosting image processing speed by 30% for real-time analysis of 10,000+ daily product assets.
- Streamlined text extraction from 500+ scanned documents per week using Tesseract OCR pipelines, improving downstream accuracy and data integrity.
- Built a PyTorch CNN image-classification model achieving 92%+ accuracy across 15+ product defect categories on 50,000+ labeled images.
- Gained hands-on experience across 3 concurrent computer vision projects covering object detection (YOLO) and image segmentation (U-Net).

PROJECTS

SEFA Audit & Financial Automation Pipeline

Python, FastAPI, Qwen 2.5, MCP, PostgreSQL

- Engineered an autonomous financial audit pipeline processing 100+ page government PDFs (capital assets, compliance tables) to replace manual review cycles.
- Programmed an autonomous AI agent with 5-step iterative reasoning loops to self-correct LLM extraction errors and align with federal compliance standards.
- Cut batch PDF processing time by 60% with a hybrid ProcessPoolExecutor/ThreadPoolExecutor architecture; used Qwen 2.5 via Ollama for structured JSON extraction across 1,000+ records.
- Added a cloud LLM fallback layer to cover edge cases, reaching 98%+ extraction accuracy while adhering to data privacy controls.

Enterprise Workflow Platform (Multi-Tenant)

FastAPI, React, PostgreSQL, Qwen 2.5, Globodex EDMS

- Led a 3-person engineering team to deliver a multi-tenant enterprise workflow platform where business users design custom processes in a visual React interface, with a separate platform-owner console for tenant administration.
- Designed an internal API plugin architecture supporting 10+ reusable workflow modules, including AI document extraction and vendor quotation comparison.
- Embedded Qwen 2.5 into the workflow engine for intelligent field extraction from unstructured PDFs, replacing 4+ hours of daily manual entry.
- Authored 15+ technical deliverables (architecture flowcharts, testing docs, API docs) to support client onboarding; live demo deployed.

EDUCATION

Bachelor of Technology in Computer Engineering (AI Specialization) — Poornima University, Jaipur

August 2020 – April 2024

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900) | Data Manipulation in Python – Udemy
